## Vendor Comparison Report

See how real users compare vendors in Digital Asset Management, Brand Asset Management and Marketing Resource Management.

# About IntelligenceBank

IntelligenceBank is the AI-powered digital asset management, marketing compliance and marketing workflow platform that helps marketing teams create and manage more approved content, faster.

## About G2

G2 is the largest and most trusted software marketplace. More than 80 million people annually use G2 to make smarter software decisions based on authentic peer reviews. G2's Digital Asset Management (DAM) Vendor Comparison Report is based on reviews and shows IntelligenceBank ranked highly among its competitors. Let's take a closer look at how IntelligenceBank compares.

# All-in-one Platform for Marketing Operations

IntelligenceBank offers one secure, scalable system for project management, brand management, content storage and distribution, creative collaboration, legal and operational review, revision requests, approvals, AI-assisted workflows and more. And it goes without saying that IntelligenceBank works seamlessly with all your team's favorite content creation tools.

Why do customers prefer one platform?

## **Increased Productivity.**

Forget multiple logins, moving content between systems, and multiple processes for the same results. The time savings speak for themselves. Best of all, teams don't suffer from the excess context switching when moving between platforms. Meanwhile, automated workflows guide content through stages from creation to publication, giving teams valuable time to spend on strategic initiatives. AI-assisted tagging and content creation helps team members be more productive.

## **Improved Brand and Regulatory Governance.**

Say goodbye to managing your brand in email, Slack and external online storage solutions. Brand portals ensure your partners and wider team are always using approved images

## **Fast Content Approvals.**

Streamlined processes between marketing and compliance and legal teams mean content gets out the door faster. And automation tools such as disclaimer engines ensure marketing gets it right in the first place.

# 88%

**IntelligenceBank**

## Workflow Management

IntelligenceBank's workflows speed up production and approvals times - but never at the expense of compliance.

Mediavalet

### **Workflows for Briefs / Campaigns**

From ideation, review, campaign approval, asset markup and approvals, to launch.

### **Workflows for Asset Approvals**

Setup simple or staged approval processes, and easily track exactly who approved what and when.

### **Integration Workflows**

Integrate your DAM with your MarTech Stack, triggering workloads in other systems. E.g. download an asset from Getty Images and its instantly in your DAM with usage rights, or notify Slack channels as new assets are added.

### **Workflows for Proofing**

Collaborate and give feedback on assets using comments, tagging, annotations and drawing tools. Compare versions side-by-side.

### **Download Approvals**

Setup specific assets to require download approvals. Or setup pre-approved download depending on your asset use case.

### **Creative Templates**

Create customizable templates that allow satellite offices to localize brand-approved assets.

### **Disclaimer Engine Workflows**

Setup logic to generate all your disclaimers at the start of your campaigns.

# Marketing Resource Management

IntelligenceBank's Marketing Resource Management (MRM) software streamlines and enhances marketing operations by providing a centralized platform to manage workflows, approvals, asset development, and distribution. With AI-powered tools, it ensures brand compliance, speeds up campaign production, and simplifies legal reviews. Integrations with popular creative applications and comprehensive project management views enable teams to collaborate effectively and maintain brand integrity. Designed for scalability and security, IntelligenceBank is an essential tool for marketing teams aiming to optimize efficiency and ensure regulatory compliance.
